

## Project Milestone 2 Update - MSC Online Platform

### Group Progress Update

Our group is slightly behind schedule, but still safe to complete everything on time. We have discussed with each other about what is causing the delay and it's simply the fact that we are busy. We have continued to communicate with each other about which deadlines we are meeting and which we are not. Few deadlines were shifted to a later date to adjust for our business. We planned to demonstrate CRUD for our home page carousel, but we are having issues with handling POST and PUT (i.e. Create and Edit) in the Admin-side. Once done, other Admin-side pages may follow easily by building on from the experience of fixing the CarouselEdit page.

### Updated Schedule

Complete   In Progress   To Do   New Completion Date

Date	Milestone	Assigned To	Task
October 16	1	Haseung Lee	[API] Create the excel document that will have the list of API and details.
